

The Gift Card Tract

The Gift Card tract is designed to be put on a European-size Business Card with rounded corners to mimic a Gift Card. Note: The front and back images are designed with an extra border area required by Card Print Services that will be cut off when the cards are printed. The resulting cards will look like the example below. The QR code on the card links to the electronic tract that contains additional information about the Gift provided by Jesus.

One example Card Print Service that offers custom European Size cards is [OvernightPrints](http://OvernightPrints.com). Just upload the front and back images of the Gift Card to their card design page and select rounded corners.

Example of what the finished card looks like.

If you want personalized contact information on the card, please contact me at the email on the example and I can provide updated images.
